## “The less you bring, the more you enjoy your surroundings...”

A new brand in the Cascade Designs family offers products for those who live life with a strong sense of global curiosity.

Hummingbird Adventure Luggage and Gear is for adventurers and adventurous spirits alike. Products offered in the line are designed to lighten the load and simplify travel so travelers can move about efficiently without compromise.

The deep roots behind Traveling Light come from the philosophies of Cascade Design’s founder and Chief Product Tester, John Burroughs. His years of global traveling combined with his innovative thinking bring a unique authenticity to this line of products. One of John’s core beliefs is this: “The less you bring, the more time you have to enjoy your surroundings. Take only items that are essential to enjoying your trip and whenever possible take things that have multiple uses.”

Each piece of gear in the Hummingbird collection has been carefully designed and selected for its ability to stand up to rugged ground or rough weather and every ounce is considered and well thought out. Our mantra: The further it gets from the front door, the more indispensable it becomes.

Hummingbird Adventure Luggage and Gear is authenticity wrapped in technology.

It’s all about the sheer joy of getting “there,” wherever “there” may be.
